THE NEW CARGO STRAP

A cargo strap that secures cargo on vehicles much **FASTER** and **EASIER**

A cargo strap that saves you **TIME** and **MONEY**.

It was about time that **QUICKLOADER** came on the market.

QUICKLOADER uses the same fabric and locking mechanism as traditional straps. The new feature that we have added is a seat-belt-like roll-out mechanism that makes attachment and removal easier, thereby reducing strapping time by up to 50%, depending on the platform and load.

Fasten, roll out, jack and lock - it couldn't be easier. Feedback from the market is good. Drivers who have tested QUICKLOADER are all enthusiastic and confirm that the system is effective and saves time.

We are convinced that you will also see the advantages of QUICKLOADER immediately when you start using it. Save time and money and give drivers a better working day!

## FACTS ABOUT **QUICKLOADER**

BREAKING STRENGTH at the correct tension 4.000 kg

LASHING STRENGTH in U-FORM 8.000 kg

LC = 1600 kg

BELT FABRIC 100% POLYESTER

LENGTH STANDARDS:

Long 9,5 m

Short 0,5 m

HOOK:

- Open hook
- Hook with lock
- 90° twist at the short end

The product is protected from corrosion.

The product complies with EN 12195-2

Patent pending PCT/NO2006/000446

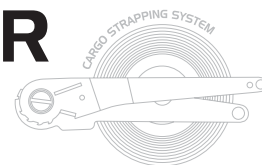

Experience the new generation of cargo straps

QUICKLOADER improves the securing of cargo on lorries. By adding a roll-up mechanism to the strap, we have made securing cargo quicker, easier and most of all just as secure as existing solutions. QUICKLOADER is the next generation of cargo strap and nothing short of a worldwide first for the transport industry!
